

BI Consultant

BI Consultant responsibilities include:

- Testing, implementing, and documenting BI systems
- Evaluating existing data-collecting and analytics systems
- Building predictive models and machine-learning algorithms

Job Description

We are looking for a Business Intelligence (BI) Consultant to help us develop and implement our business intelligence systems.

BI Consultant responsibilities include analyzing acquired data, evaluating existing systems and testing new ones. If you have a background in Computer Science and experience with analytics tools like Tableau and Microsoft Power BI, we would like to meet you.

Ultimately, you will help us turn data into knowledge using predictive and analytics solutions.

Responsibilities

- Test, implement and document BI systems
- Evaluate existing data-collecting and analytics systems
- Build predictive models and machine-learning algorithms
- Analyze big data to discover trends and patterns
- Translate business needs into technical specifications
- Establish procedures for data sharing with internal and external stakeholders
- Ensure we use accurate and secure methods to extract data
- Use data visualization techniques to present information

Requirements

- Experience as a BI Consultant, Data Scientist, or similar role
- Familiarity with our industry is a plus
- Experience with data mining
- Good knowledge of machine learning
- Experience using business intelligence tools (like Tableau and Microsoft BI Power) and data processing frameworks (like Hadoop and Samza)
- Strong skills in statistics and reporting
- Bachelor's in computer science, Engineering, or relevant field
